

FERNANDO QUIJANO
BADM 455
3:00 p.m.
Fall 2001

1. I enjoyed the class.
2. The teacher used a variety of resources in a useful way including technology.
3. I didn't really get a lot out of this class. He lectured, then he would take a test, but his lectures were pretty much ___ in the test, so you really didn't even need the book. He, however, is very enthusiastic in his lectures were fairly interesting.
4. Material was presented enthusiastically and made very interesting, but the course material was commonly hard to find because the instructor would sander from the subject, which made it hard to decide which material pertained to the test. Tests were too long and should be more evenly divided between chapters.
5. I think the course in overall was taught well, but the time (2.5 hours on Monday) seemed inappropriate.
6. The only reason I would take another course from this instructor is because I need the classes. I thought that he is very disrespectful to the students. If you need to talk to him, he does not listen and tries to make you feel like crap. It is also very interesting when he tells stories of how he does drugs back home. I think he is a horrible teacher.
7. He seems to have a fairly good knowledge. He told us he doesn't know much about business. He uses an effective amount of technology and the internet.
8. I think Mr. Quijano is the worst professor I have ever had or heard of. He is rude and for a small campus like DSU a professor that is rude is not liked. He grades on attendance which is find if you are credited if you show up, not docked if you don't show. I come to class regularly so that's not why I am saying this. He needs to learn to respect students so they respect him. He is a horrible teacher.
9. Points should not be deducted for missing class.
10. I believe that Fernando has good knowledge in this class. The presentations are an excellent way of teaching the the the chapters – to learn that info through the presentation and learn through giving the presentation over a particular chapter.
11. A review of economics would be helpful. It has been a few years since I took microeconomics and I couldn't remember. The worksheet was very hard to understand. Parts of it we never talked about in class. I did not understand some of it. Used technology very well. Used computer and projector in classroom and used internet.
12. I've taken courses from Fernando before and I actually liked them. This year, however,

he has seemed to change. He's not nearly as enthusiastic or respectful. He's cranky and takes it out on the students.

13. By learning about only one chapter to do a presentation for me was not effective. I have already taken Micro and Macro economics. I'm suppose to be learning about International Business not about smoking pot in Columbia, and how cheap the pot there is.
14. He has great knowledge about International Business. He teaches effectively and efficient to the course with testing and grading. Usefulness of homework assignments handouts and the quizzes enhances the learning.
15. I really liked this class and he taught it goof for it being a business class and he is a economics teacher. The only thing I didn't like was the grading and how he dropped you if you missed a class and I only missed an ____ and he dropped me all 5?
16. Fernando had a great knowledge of the subject with the economic part, not business parts.
17. The instructor taught the course effectively and with a through knowledge. The content of exams and quizzes was well thought and although he should consider giving sample tests prior to the test as a study guide.
18. The instructor is enthusiastic and has goo knowledge in economics, he also can be very picky and moody at times.
19. Instructor was cranky at times and then easy to get along with at others. Some written remarks given out for one assignment I felt were crude and un-necessary.
20. The class was another class of Macro/Micro.
21. He doesn't explain things very well. It was hard to sit through a 3-5:30 class.
22. Fernando is a fun teacher to have. Seems to be up to date on technology.
23. I think you should be fair in attendance! Some people get away with it while others don't. I don't think this is fair.
24. Professor was knowledgeable and friendly. Technology was used in each lecture. Material was presented fairly before tests. Tests contained material taught.
25. The instructor has a good knowledge about economics but says/admits that he knows nothing about business, so why is he teaching an international business course. Instructor was very untrusting of student absences.
