

FERNANDO QUIJANO
ECON 105
6:00 p.m.
Fall 2001

1. I felt this class was excellent. The professor's extreme knowledge of the class material was evident in the fact that he was able to answer any and all questions asked of him. His explanation of class material was always comprehensible and he made learning the material easy. His teaching was sensible and made it simple to apply the concepts to our "real world." The use of the computer in class with the power-point presentations was very helpful, as well as the fact that the material was available on the Internet before each class. The professor's ability and knowledge of the computer, Internet and how to use it all together were excellent. The book used in class was a current edition, which was nice. The professor's knowledge of the material in the book was very good. The tests that were incorporated as a learning tool were very helpful in allowing me to understand the chapters. It was helpful in demonstrating how a test could or may be presented. The course helped me to understand the bigger picture of economics. I tend to localize everything and this class helped me to broaden my thinking and understand how little we are and how big the government is. I did learn how to graph in the class with excel. Not only did I learn about economics, but was educated on software usage as well. I appreciated the fact that the professor was very sensitive to the fact that students try hard and may not get the best grade – they have done their best – and he rewards them for that. He recognizes effort and rewards it. That to me is a positive thing and will enhance a student's learning. Exams covered enough material, usually 3 chapters. They were always reviewed for, which was helpful. It was always nice to be able to check the web page and find out your grade within a day, or sometimes less, of a test or assignment. I loved the fact that so much information was available on the web regarding the class. Email made it easy to communicate if you had questions to ask the professor. I would be very delighted to take another class from Professor Quijano. I felt his class was one of the best I have taken at DSU and I feel that he thoroughly knew his material. He is very open minded and willing to listen to any and all questions and not belittle the person asking the question. It was a fun and interesting class and even though it was 2 hrs. and 50 mins. Long, the time flew by because he made it interesting.
2. I extremely enjoyed this course. I thought it was taught extremely well. His use of the internet is something I think every teacher should start doing. I learned more in this class than I did in any other this semester. He made it very interesting and was a great teacher. I would recommend this class to anyone.
3. The combination of power point and chalk talk lectures added more variety to the class. This made learning the material easier and more enjoyable. The power point content was easier to study for tests but the chalk talks were better for overall knowledge of the class. Maybe focus more on chalk talks.

4. I think Mr. Quijano did a great job teaching this course. He is very knowledgeable and brings the subject to a level that is easily understood. (This subject seems very complex.) He used everyday examples and situations to make it even more easy to understand.
5. Fernando taught this course very effectively! I like the use of the power point presentation. I also like how he updated our grades and were made available to us via internet!
6. I thought that this course was taught very well. It was an enjoyable class.
7. I liked the way you taught this course. It is a difficult subject, but you're very good at explaining it to us. I'm very glad we used the textbook-website, it was very helpful. I also enjoyed your jokes!
8. Mr. Quijano was a very helpful teacher to me. He helped realize what I want to major in and helped me get on the right track.
9. Excellent class. Very well taught. Instructor is very knowledgeable and able to answer all questions in an understanding way.
10. Mr. Quijano had a very well nature for teaching the class. His use of the internet and power point presentations was fantastic. I really learned a lot from his class. Technology is increasing greatly in our society and I liked the fact that he based lectures on our modern technology.
11. Mr. Quijano definitely knew the material very well and did a good job of presenting it to the class. He also had a vast knowledge of computers and used resources he had off of the internet.
12. This course was very interesting. Dr. Quijano taught so that I had a very good idea about the basic fundamentals of economics. His use of the Internet to allow students to prepare themselves is very unique.
