10. This course is a great one and I would advise other people to take it even if they are not in a business major.

10. Fernando Quijano has been a great instructor and I will continue to take courses from him.
10. A course in Quatro Pro should be a co-requisite for this class.
10. No comment.
10. Fernando was fun to listen to and made it enjoyable.
10. No comment.
10. Fernando is the best professor on this campus and I wish he taught more classes. He is one of the best teachers I have had throughout my education. Fernando is the man!
10. No comment.
10. I thought that this course was ok.
10. Mr. Quijano is very knowledgeable and has an effective and enthusiastic way of presenting a subject that I think most people are not interested in.

10. The only problem, I think the directions given out once and try not to change your mind on the directions so many times. However, I have enjoyed the course.
10. A very well taught class. The material related to the graphs could have been explained a little more thoroughly. Overall, I learned a lot from this instructor and he made the class enjoyable.
10. No comment.
10. I thought that the instructor taught this course very effectively and kept it interesting throughout the semester.
10. This instructor is very knowledgeable to what he is teaching. The longer I have been around him, the more I have enjoyed his teaching.
10. Fernando is a cool guy and definitely knows what he is talking about. I liked that he wrote everything on the blackboard as we could see the examples. He is also very energetic which helps to keep a boring class interesting. It would be nice if the course used the book more. We purchased a book that the instructor himself said he hasn't read. The graphs we did were also a waste of time. Too much time was spent on giving the graph assignments and not enough on the actual assignments. The only thing I can say I learned was how to use Quatro Pro.
10. I think the course is taught well because he writes a lot on the board, and usually gives us good reviews for what to expect on the test.
10. Quijano has been rude to students. Is perverted and makes sexist remarks often.
