Comments
Very tough course....very hard to understand the concepts when we go so fast through the course.
I feel that a graphing course would work better as a prereq for this class instead of college algebra. I do feel that this course is tough but fair at the same time.
He was usually late, but kept class interesting and taught it well enough that I wanted to come back to class. I find applications for economics outside of class every once in a while.
i found this course to be rather difficult at times.
The blackbord notes were very helpful but it would be nice if you could go a little slower. The homework assignments helped extremely. Going over the test the day before the test was really helpful. I knew what to study. Having the grades that night really took a load off my shoulders for the weekend.
I feel i have learned many ideas for this class. But i did not enjoy the class itself but i did like the teacher. The class was very hard for me and feel that it took me another another level of thinking.
I believe that a class which is based heavily on excel should be a pre-requisite for Microeconomics.
The only suggestion that I have for this course, is that Fernando doesn't talk in economics language, this is because when I first came to this class I really didnt have any Idea about any economics ideas.
this class was so satisfactory, because i liked the way the teacher teaches, like writing down the lecture on the board and explain the lecture by examples,,, i would love to take an another course from this teacher, even though my grades are bad at this class,,, thank you
Homework assingments was good and helpful because they were online. Teaching styles are good. Lectures have visual graphics and explains through every step. I will take Macro economics from this instructor.
The instructor was informative and his presentation was discussed throughly. The quality of blackboard presentation was very nice for me to use. It was helpful to do the homework assignment. It was also really nice to have the exams graded the same day that we took the test. I gained alot of economic experience. IT helped me out in my calculus class. he was a fair teacher on his grading system. I liked this instructor. He was very understanding and he took the time to help all of his students.

The instructor was very informative and helpful. A lot of the content was discussed thoroughly. Throughout the semester I gained a strong understanding of microeconomics and the economy.

It was very handy that the professor had the tests graded the same day and that our marks were available.

The homework was helpful and not overloaded.

that's so good,excllent

gained alot about economic

the teacher is fair

homework assignment is useful

the teacher helped us for exams well

this course is rather useful campared with other course i took here

Everything is wonderful! I like this course very much

Nice Professor!

it is really a great class! the instructor is charming! what he teaches us is useful.

Fernando is very knowledgable teacher. He teaches his class always blackboard presentation. He take the exam always our notes. That's very easy to prepare my exam. He take assignment from his website. That's verey interesting.

I am very much happy and satisfied that I took this course, especially with Mr. Quijano. Besides, I think he should not give the answer when doing exam preview, this would intellectually challenge the students and also avoid students from copying the answers to get the better grades than they deserve. This would justify the effort put on by the hard-working students.

I really enjoy this class, it helps me really in my life and i even give my parents a usefull ideas for our bussines.I am sure that this is my way,economics is how we can make your world better for us,so working hard and some day i might have the chance to change the worlds economic!The teacher was very good!

Nothing,every thing is perfect.

I really like Fernando

the instructor is excellent!

It help me to improve my Excel skill and the understanding of graphs. I like the professor's teaching style, his notes and graphs. It's quite intersting.

perfect teacher ,wonderful class, interest coach.
