| He was late EVERY day by at least 5 minutes each day. He was very rude and picky about the assignments we had to hand in. For example, our first assignment of the year if we put it on lined paper we got a 0 for it.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |

| I felt that this course required a lot of hard work and was challenging. However, I always felt like the class covered the material thoroughly, and I enjoyed the subject of economics more for it. Professor Quijano is very precise about what he expects from the class, and he teaches in a way that makes it easier to apply economics in the real world.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |

| The teacher's approach was good and that for me is the main reason for my understanding the course so well. I encourage the teacher to continue in the same manner.<br>The assignments given by instructor to be done on the computer was a great challenge. As a result of taking this course, i got to uderstand how to use Excel and graph functions. I also leant a great deal of geometry. The course is not my best in terms of grade. However, it is the most interesting and challenging course i am taking this semester                                                                                                                                                                                                                                                                                                                                                                                   |

| This instructor should not be teaching. I feel that his tests cover nothing that was in the textbook that was assigned for this class. He was constantly telling us to change our majors and that we were not getting the material that he was teaching. No matter how many hours I spent studying for his tests, I could not get a good grade on them. When a teacher has over half of the class failing his first 3 tests when only 5 are available, that should tell the university that the teacher is not doing his job. I feel that this course was a waste of my time and my money. In the future I believe that I will have to retake the course so that I actually learn about micro-economics. My lowest grade has been a B the entire time that I have been at DSU and I am just hoping to get a C from this teacher. An evaluation of this teacher needs to be done because he is not doing a good job. |
| We must have a change from the graphs. This is because so much graph and the way they are taught is very confusing. Furthermore, no matter how much studying and stuff that I do, the more I feel as if im failing. So there has to be something done about some ways of teaching.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  |

I don't think its fair that he takes points off because papers weren't on printing paper or for little things like having boxes in graphs. He says its to make all papers uniform for him to correct, but most students have other classes that they are enrolled in and can't spend a ton of time on miniscule things like that. Also I think it would be beneficial when explaining things that he write them out instead of just drawing the graphs of what is going on.

Oh my god, if DSU fires Fernando I am going to be mad. I did not say that they will fire him, but if they do they will a key aspect of learning. To be even more direct, this teacher deserves more salary or he needs to teach at another school that is higher level. This teacher has got to be the best here. He knows a lot of things, and when I say that, I mean he does know a lot of stuff. Although the course was intelectually challenging and hard for me, I will take Macroeconomics with this teacher again next semester because the course and teacher amazed me. No comment, take this class, and feel the power.

I could hardly understand the professor because of his accent.

I think this teacher is one of the best teachers in the world, he's teaching style, he's exams are all perfect, and professional. Really appreciate his knowledge. My evaluation is PERFECT PERFECT and again PERFECT. Thank you very much.

Overall he is a good teacher but doesn't take student feedback very seriously. Things are his way only. His reviews for the test are very helpful.

As a professor, Fernando is very knowledgeable, versatile and humorous in his class. He is skilled at computer science, art and microeconomics at the same time. I really enjoyed this course.

Seeing from Fernando's own website, I have the chance to appreciate vivid and clear graphs which related to economics.

With the help of assignments, quizzes and exams, I accumulated a lot of knowledge about the electronic drawings.

By way of his detailed class notes and humorous teaching style, I grasped important points about microeconomics.

In a word, Fernando did a good job.

the teacher is a very intresting teacher. he makes the class fun and goes the extra mile in heloing his students out weather it be in the classroom or in his office. the work load id probably right on point for his exams. i like the way he teaches, lets you know when you did something wrong and also lets you know when you did something right. i would recommend this teacher to anyone who needs to take this class he is fun and interesting.
