Mr. Quijano did an effective job of teaching this course. He is extremely knowledgeable about economics. He kept the class very interesting. I found his website and powerpoint presentations very helpful as well as the course compass. The in-class exercises were very beneficial and it would have been nice to do more of those. Also, it would have been helpful to be taught how to do the graphs in excel that were required in the homework. Overall, the course was enjoyable.

Mr. Quijano is really a good instructor. He uses the correct tools (book, examples and other materials) to teach students. I really learn a lot from this course though I'm getting higher grades in other classes this class is really good for future experiences and it's not really the grade that counts to me, it's what you learn because you will need to apply it in the future jobs. I really look forward to take another course from Mr. Quijano.

The work assigned was helpful. Yet the computer course was not. Your website was helpful to students. The electronic blackboard was useful. The exams for the course were hard.

Fernando taught the class very well and was very knowledgeable in economics. I believe that he should explain the material a little slower so it would be easier to understand and more test allowing for better grade in the class.

I think Dr. Quijano is a very smart and knows his material very well. He makes it a very challenging course.

I love this course. He is a great teacher and he really loves the subject. I am learning a lot, and I understand it... most of the time. He is very kind and willing to help all of us. I enjoy this class a lot.

This class covers a lot of information and I think the instructor has make it as pleasant as could be to be in class every day. That has a large number of students in it and teach on a subject that is tough to grasp for many people.

The class is one of the more difficult classes I have taken though it looks like I'm struggling to do get some or most of the knowledge. I am just a bad test taker. You're doin great.

This class was fun and I learned much. Keep up the good work.

I enjoyed this class very much. The teacher made the class very interesting. He knew what he was talking about most of the time. The material he gave us was very helpful. Some was a little confusing. The teacher was very fun and made the class enjoyable.

He teaches over the head of students.

He is an excellent teacher with a sense of humor.

Mr. Quijano is very knowledgeable about the subject of microeconomics and he uses a style of teaching that sparks my interest. He does a nice presentation, and the on-line materials are helpful. I gained a lot of knowledge in this class. Grading was fair. It isn't an easy class, but I like it. It is one of the most interesting courses I have taken.

When I started the class I wasn't sure exactly what economics was. I hadn't taken economics before so it was a learning experience. It was made easier by the knowledge use of the teacher and his style of teaching made the class fun. It took me a while to catch on but through the internet course Myeconlab and the online quizzes I'm starting to get the concept. Very well taught and my kind of humor.

The professor had a great deal of knowledge about the subject and material in the course. The online material that was made available was very handy and helpful. But it would be a great help if there was more out of class work that was graded. A suggestion would be to make some questions at the end of the chapters be graded. Otherwise I gained a great deal of knowledge about economics. I really enjoyed the course and the teacher.

The class was very challenging and was fun. The instructor knew it all but maybe too good because tests seemed to be overwhelming. Also would have been nice to have a few more homework assignments to help with the boosting of grades. But overall the class was good.

I think the instructor had thorough knowledge of the subject but I think he could have taught more from the book that way if we don't understand something we could look it up. I think there should have been more homework to practice the concept instead of just testing on them. I think the instructor tries to trick the students out of getting good grades by confusing us (not giving good enough instructions).

I felt the instructor really knows the material well and knows how to explain it. This class is really a challenge.

I have enjoyed this class even though it was extremely hard. I learned a lot from professor Quijano, who was always available to ask questions or help me out.

I probably wouldn't take microeconomics from him because I think he teaches in a difficult way especially when it is all new to you. I do like how he gets the class involved though and brightens us up. I think there should be more homework to bump up

our grade. The tests shouldn't be so long and hard. It seemed half the class flunked every test. That isn't good.

Professor Quijano is very excited about the subject of economics and has always been there to answer my questions I will take more courses from him.

I learned a lot in the course, but felt that too much material was covered without appropriate time. The material was explained well, but there was simply too much on each test.

I think you put together enough information to do well on your test the harder you try the better you will do. I like the online quizzes and study guides are very helpful.

I enjoyed the class. There was a little struggle in understanding the material but overall he was a good instructor.

Mr. Quijano is an excellent professor. He has a very thorough knowledge of the subject and it is evident that he is very familiar with the text and how the information is presented in the text. This is very helpful in studying the material. Mr. Quijano has a good lecture prepared for every class hour with plenty of examples that his students can relate to.

It was nice to have the website available for studying. I wish we would've had some in class worksheets to help understand concepts and remember formulas.

The tests were good, but he allowed us to use notes and books for the easiest test and the next test which was the hardest test, we were not able to use anything. He expects us to know how to use excel, he gave us assignments that we had to use excel for, and he said we could not ask him questions about computer assignments. He is always late for class.

I have enjoyed your class. You are a fun instructor to have. I felt that the class was taught effectively. The only concern I had was you felt once in a while there was some material on the test that was not covered very well in class. I am looking forward to taking macro from you also. Thanks for a fun time!

The professor has a very thorough knowledge of the course and presents it in an understandable style. He makes the class fun with his humor. The online material and class course material was very helpful.

I felt that this course was very challenging. I liked the class and the teacher, but found it very hard to understand and comprehend all the material that was given.

The notes taken in class were very helpful. Lectures were very interesting and well taught. The online quizzes were very helpful in testing my knowledge before test and were just a good practice. The homework was also good practice. It is a tough class but I enjoyed it and learned a lot.

I feel that economics class is one that is very interesting and educational. The book is very appropriate for the class and all of the online material is awesome. All in all it is very interesting and worthwhile class that I would recommend to anyone with an ambition to learn.
