

Fall 2004
Econ 201_10am
28 students

The website was very helpful and detailed. The tests were hard but it really made you learn the material, which is the point. The instructor was very knowledgeable and taught it very effectively.

You have been very helpful throughout the entire semester. I really appreciated how quickly the grades were posted and having the website with all the interactive graphs was very beneficial. I have learned a lot! Thank You.

The website was handy and did appreciate the grades posted fast. I can see a lot of work went into the website. Has good knowledge of the subject, but sucks at teaching it to us. I think he is a nice guy with a few rude comments but needs to find a different way to teach the material.

The website was helpful for test, but tests should pertain more to class discussions.

He knows the material extremely well. Was sometimes hard to understand because we are not at his level. His notes were excellent. I thought he did a good job.

I think Mr. Quijano is a good teacher. His grades are posted right away. I just wish I could understand a little better.

Quijano helped us a lot with homework and study material. The course website was awesome and Quijano's course website helped a lot.

Website is a great addition.

Need to explain material a little more slowly and more in depth. Would help us as students understand a little bit more.

I believe that the instructor knows so much about the course and expects the students to know everything as well. I think his expectations are high.

Good class enjoyed instructor's knowledge and willingness to help.

Mr. Quijano has a thorough knowledge of this course. His website and use of technology are very effective.

I liked how we could go to his website and see any postings about the class. He also had grades up very quickly.

Quijano had thorough knowledge of course, but it is hard to understand some of the things cause he talked on a level where he thought everyone else should be.

His website was helpful. He taught the course well, but he needs to have a better attitude towards the students. His swearing needs to disappear.

I feel that Fernando is a good teacher, but is too smart and sometimes can't come down to students level of knowledge, which makes it hard to understand at times. I like him, and will probably take him again

You Suck! Just joking. Obviously knew the material, it was just hard keeping up at times.
