

Fernando Quijano
ECON 202
3:00 Fall 2005
16 Students

Mr. Quijano makes Economics interesting by giving real life examples. His humor is a plus. Website is excellent too

Dr. Quijano has been a very understanding and helpful instructor.

I think that his course has been extremely helpful to me. The teacher made the content easy to understand. I feel that the teacher really wanted everyone in the class to succeed.

Challenging and interesting. Keeps everyone's attention and incorporates current topics with the class. Knows the material very well.

Fernando is a good teacher, who has an overwhelming amount of knowledge about the subject. He make class fun as well as providing us with a lot of information.

I fell DSU is honored to have Fernando as a teacher here. Just because so students are lazy and complain about the course being to hard doesn't mean he is not a great teacher. I may have passed micro with an A but that because I busted my tail in that class. Maybe some students need to pick up the slack. I really enjoy this course.

I like the take home tests we are provided with, it makes learning much more fun & you are stimulated more because you can focus on learning the material, not just memorizing it. Having grades posted online is a big help & useful

Great instructor. He teaches this subject very well. He gives various examples to explain the concepts. The tests are challenging. Homework assignments are hard but help to teach me.

Fernando is a very effective teacher. He always presents his material well. He gives his students the opportunity to really challenge themselves when it comes to economics. His dedication to his work is awesome.

Take home tests. Grades are always available right away, many tests are chances to improve grade, Fernando is always on time.

Class notes are written on the blackboard. Take home test. Very interactive. Good Website Posting. Homework has to do with what we are learning.

I like how we get feedback on our tests shortly after we take them. I like how the instructor posts grades and notes online. This instructor is very challenging but I really learned a lot.

I liked how tests were given in class and some take home! I liked how he demonstrated what he expected our assignments to look like.

Instructor writes notes on the blackboard along with in class discussion. –Website service, grades, handouts, syllabus, etc. –Take home tests –Many tests and chances to improve –Relevant homework assignments and learning tools available

I have always liked classes where the instructor writes the notes on the board. I also like that he has a website where we can see our grades or other notices in a timely manner. I like that he allows us to work together on some assignments, I believe I learn better that way.

I really like the environment for this class. I am the youngest in here and I don't feel like that really hindered my learning at all. I like Mr. Quijanos approach to teaching and his methods. I myself learn better when Im given the material and when Im expected to take perfect notes. This class has been very beneficial to me because of these reasons.
